

TECH MAKES THE WORLD GO ROUND

PART 1: IDEA BRAINSTORM

What problems/issues/challenges do you see in your community or in the world that you feel need to be addressed?

PART 2: WHO ARE YOU BUILDING FOR?

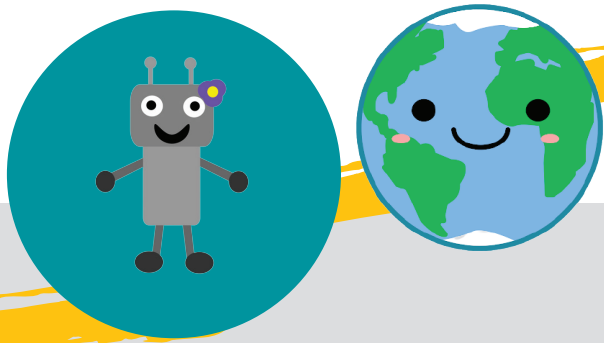

Pick 1 of your ideas from above. Who does this problem affect?

What questions would you ask them about their experience?

PART 3: WHAT WILL YOU BUILD?

If you had unlimited resources, knowledge and teammates, what could you build to address that problem?

All ideas are good ideas! There are no wrong answers here.

TECH MAKES THE WORLD GO ROUND

PART 4: PICK ONE SOLUTION & SKETCH YOUR DESIGN HERE!

A large, empty rectangular box with a thin grey border, intended for students to sketch their design.

PART 5: BUILD A PROTOTYPE OF YOUR SOLUTION!

A prototype is an early model of your solution idea. It doesn't have to work, it's just a model to communicate what your solution will become over time.

We'd love to see what you built!
Share photos of your prototype on Instagram with the hashtags **#BurkeMuseum**, **#TeenSTEM Cafe** and **#TechMakesTheWorldGoRound** so that we can see what you invented!
