

Flowboard App Builder

FAQ

Questions:

- How does it work?
 - It's simple, just create a Flow using Flowboard, available on Mac and iPad. Then visit www.flowboard.com/ipad-app-builder and fill in your app information. You'll then be asked to pick a subscription plan. We'll take your Flow and turn it into an iPad app. From there we can submit it to the App Store for you, or you can use your own Apple iOS Developer account to distribute it privately to members of your organization or publicly in the App Store.
- What is a "Flow"?
 - A Flow is the name for the presentations you build using Flowboard. This very guide is a Flow. Flows can be used to present from the web, iPads, Macs, or any device through a web browser and now can be turned into iPad Apps.
- What platforms will my app run on?
 - Flowboard App Builder will publish and build your Flow as an iPad app. It will work on all iPads running iOS 6 and newer. We have plans on to support iPhone and other platforms in the future.
- Does the App Builder work on Android?
 - No, not presently, but we have plans to support Android soon.
- Who owns the resulting app?
 - All the code within the app is owned by Flowboard (Treemo, Inc.), but all content is owned by you. If you supply us your Apple iOS Developer certificate, you can distribute it yourself.
- What will it cost?
 - Our introductory pricing is based on number of employees starting at \$99/month with a one month set up fee for 1 to 99 employees. 100 to 999 employees costs \$199/month (and set up) and 1000+ employees costs \$299/month (and set up). Education institutions, non-profits and museum all pay the \$99/month rate. In addition, if you wish to distribute the app privately, you will need to join the iOS Developer Program with the Company enrollment type which will allow you to do ad-hoc distribution (<https://developer.apple.com/programs/start/standard/>).

- Can I sell my app?
 - Yes, as long as you supply your Apple iOS Developer certificate to us and choose and manage your own pricing.
- How do I cancel?
 - You may cancel at any time for any reason. Just send us the email you used to subscribe and we'll take care of the rest.
- Can I update my app?
 - Yes you can! Updating your app is as easy as editing the Flow it's based on and posting it again. Your users will get the updates the next time they view your app with an internet connection.** NOTE: This feature will be launching by December 15, 2014.
